DETAILED ACTION

Response to Amendment

1. status of claims 1-40 should be provided so as to be compliant with the new Rules.

Claim Objections

2. Claims 43-46, 48-49, 51-57 are objected to because of the following informalities: claim 43, line 7, "comprising" is mistyped as "comprsing" the same comment applies to claim 48, line 9; claim 51, line 10; claim 52, line 7; claim 55, line 7, claim 56 line 7. Note that any claim whose base claim is objected is likewise objected. Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory

double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 43, 44, 48, 49, 51-57 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 and 6-8 of U.S. Patent No. 6,771,725. Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention as claimed in claim 43 of the pending application in the invention claimed in the patent differ from one another by the fact that one is an apparatus type claim and the other is a method however, configure a device or apparatus as claimed in claim 43 of the instant application to implement the method of claim 1 of the patent would have been obvious to one of ordinary skill in the art as such implementation would have provided an appropriate medium to practice the invention.

As per claim 44, the additional limitation recited therein is included in claim 1 of the patent, therefore, the analysis made in reference to claim 43 applies.

Claim 48 incorporates the method steps of claim 2 of the patent therefore; the analysis made in reference to claim 43 applies.

As per claim 49, it would have been obvious to one skill in the art to set the transmit clock to zero in order to calibrate the unit.

Claim 51 implements the method steps of claim 2 of the patent therefore;
the analysis made in reference to claim 43 applies.

Claim 52 implements the method steps of claim 3 of the patent therefore;
the analysis made in reference to claim 43 applies.

Claim 53 implements the method steps of claim 4 of the patent therefore;
the analysis made in reference to claim 43 applies.

Claim 54 implements the method steps of claim 6 of the patent therefore;
the analysis made in reference to claim 43 applies.

Claim 55 implements the method steps of claim 7 of the patent therefore;
the analysis made in reference to claim 43 applies.

Claim 56 implements the method steps of claim 7 of the patent therefore;
the analysis made in reference to claim 43 applies.

Claim 57 implements the method steps of claim 8 of the patent therefore;
the analysis made in reference to claim 43 applies.

Allowable Subject Matter

5. Claims 45 and 46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
